Re: Advisory 12-07: BLS Medication Vodcasts

Due to the success of the video podcast training for EMS providers and requests for additional training specific to BLS skills, the Program Agency is releasing a new series of BLS Medication Vodcasts and Quizzes for CME credit.

With the support of the University of Rochester Medical Center, educational vodcasts have been created to provide information about Aspirin and Nitroglycerin, Albuterol, and Epi-Pen administration for BLS providers. The training is not mandatory, but highly encouraged. In order to be eligible for one (1) hour BLS CME, the provider must watch all three videos and complete the post test. The link for this training can be found [here](#).

With any questions, please do not hesitate to contact the Regional Program Agency.
