

## Advisory 25-07 New and Updated Policies

To: All EMS Agencies

From: Jeremy T. Cushman, MD, MS, EMT-P, FACEP, FAEMS   
Regional Medical Director

Date: June 18, 2025

---

At their June 16<sup>th</sup> meeting, the Monroe-Livingston REMAC approved a number of policies which are effective immediately. They are attached and as follows:

**Transport of the Chronically Ventilated Patient Policy** – This policy outlines the expectations surrounding the prehospital transport of the chronically ventilated patient and provides a best-practice algorithm to guide the EMS clinician in determining the resources and care expectations for providing a chronically mechanically ventilated patient with the safest possible transport.

**Drug-Assisted Airway Management Policy** – This policy replaces the “Rapid Sequence Induction Program” Policy and sets the regional standards for initial and continued credentialing to perform Drug-Assisted Airway Management.

**Prehospital Electronic Cardiac Monitor Data Policy** – This policy outlines the expectations of storing and making available to the MLREMS REMAC cardiac monitor data, defined as electronic files often of a proprietary file type unique to the device manufacturer.

Please do not hesitate to contact this office with any questions.
